Smart Keg Monitoring System

kegtron.com

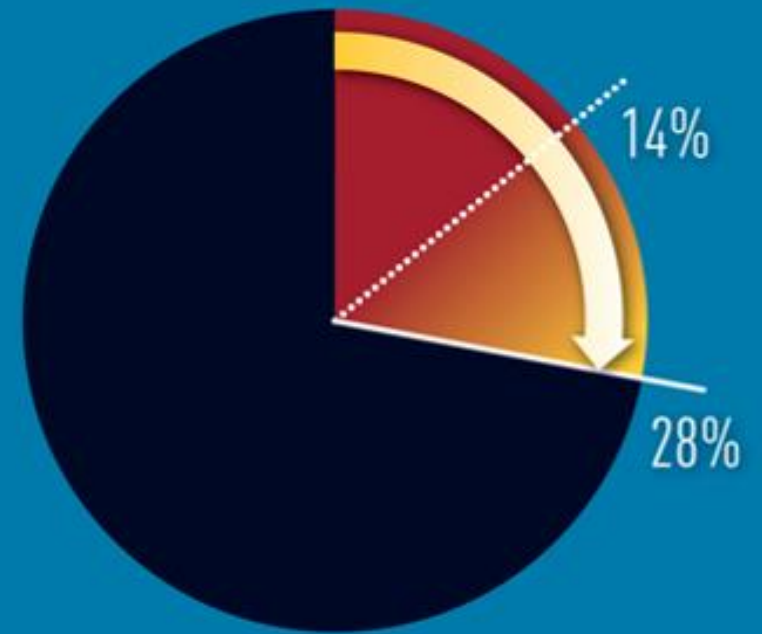

Kegtron

Draft Beer Loss Is Costing You Money

>20% loss per keg is common across the industry

-  **Overpours & Giveaways** — Unmonitored pours add up fast
-  **Invisible Shrinkage** — No data means no accountability
-  **No Visibility** — You can't manage what you can't measure

Nearly all bars, restaurants and taverns are **missing at least 14% and sometimes as high as 28% of their beverage inventory.**

POS Integration

Any Device

Flexible connections · NSF-rated sensors · WiFi cloud-managed · Scales from 2 taps to hundreds

Kegtron

Purpose-Built Draft Monitoring Hardware

Quad Keg Monitor — 4 taps

Dual Keg Monitor. — 2 taps

- Precision Swiss flow sensors, NSF-rated
- Long-draw, direct-draw and kegerator compatible
- Flexible John Guest push-fit connections adapt to any barrier or vinyl line
- Modular — Scales from 2 taps to hundreds
- No hubs, gateways or PCs required
- WiFi connected, cloud-managed

Real-Time Visibility Across All Taps

- Accessible from any phone, table or PC
- Use any browser or install Web App
- Three drill-down views:
 - Sites → Keg List → Keg Details
- Live status, volume served, days on tap, serving count

< Kegtron		Moe's Tavern							logout
